

IC-2 Better Scientific Presentations and Writing

Person in charge and Representative	Kacprowski / Deserno
Contact person	BIOMEDAS
Semester	2
Topic cluster	Interdisciplinary
Duration/Credit	6x1.5h
Time	The exact date incl. time will be announced separately
Place	Online. Dial-in data are sent separately
Prerequisite for the lecture/course	<ul style="list-style-type: none">• Sound knowledge of English (written and spoken)• An own current research project to be presented
Aim of the lecture/course	<p>In the first part of the course, students will learn the principles of scientific writing and gain insights into how to improve their writing. Topics include structuring the text, appropriate wording, comprehensibility of text, efficient production, review process and ethical aspects.</p> <p>The second part covers oral presentations and scientific talks. Students will learn how to properly structure a talk, how to prepare adequate visual aids (“presentations”), and how oral presentations are different from written text. Using their own research projects as well as other topics in exercises, students will practice and improve the delivery of their oral presentations.</p>
